

PDFBlaster is a revolutionary intelligent printer driver that streamlines PDF creation, fax and email routing and document archiving of your most mission critical accounting forms. PDFBlaster Installs easily on any Internet-enabled PC and requires no additional hardware or software. Use PDFBlaster and blast your company to new levels of supply chain responsiveness, cost savings and worker productivity!

Internet Faxing from Accounting

Easy to install. PDFBlaster uses your existing internet connection - not modems, fax boards, dedicated servers and phone lines. In fact, no additional hardware, software or integration work is necessary. Just install, point to your accounting system, and start sending.

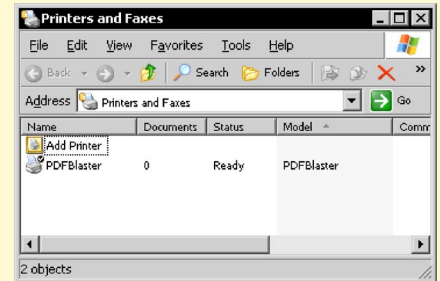

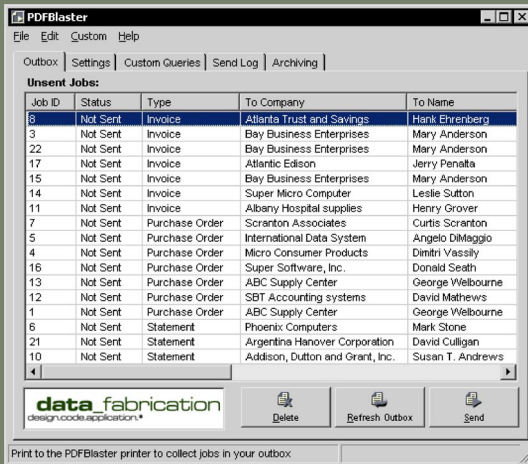

Responsive. PDFBlaster links to an international telecommunications network that is outfitted with thousands of available send lines at your disposal. Thus, processing hundreds of outbound faxes with PDFBlaster takes minutes -- not hours -- with each of your customers and suppliers receiving their faxes almost immediately, regardless of where their fax job is in the batch queue. And, better yet, you're free to get back to more important things -- like growing your business.

Cost-effective. PDFBlaster can be thousands of dollars less than a typical dedicated fax server, fax board and software.

Smart. PDFBlaster utilizes our own SmartFind™ technology to handle the arduous task of pre-addressing each accounting document for you. No more typing names, email addresses or fax numbers!

Convenient. Digital delivery of your mission critical accounting documents is as easy as printing to the PDFBlaster printer. PDFBlaster supports individual, auto and batch-mode printing of AR invoices, AR credit memos, AR customer statements, OE orders, OE Acknowledgements, OE bids and quotes, OE pick tickets, PO purchase orders and more. If your users know how to print these documents to a regular hard copy printer, then they already know how to use PDFBlaster.

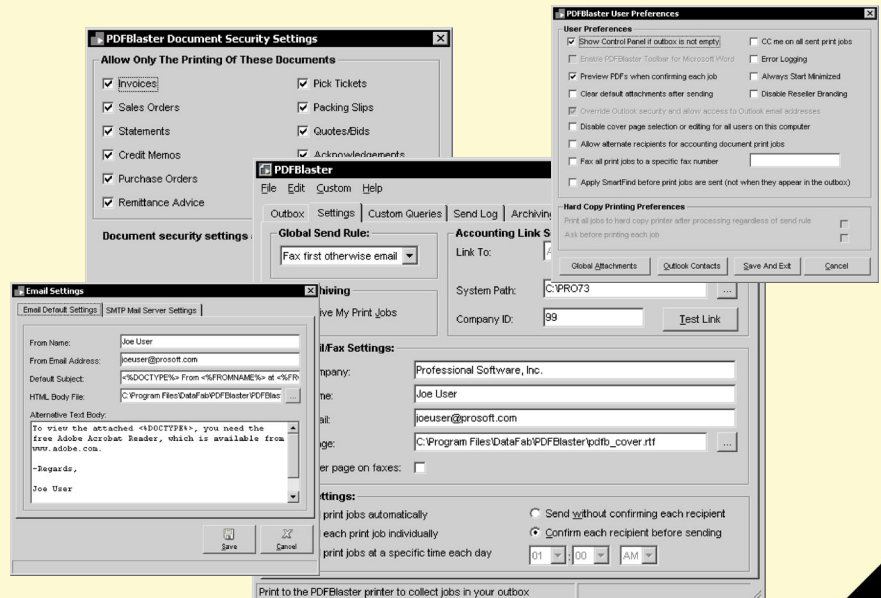

Friendly. PDFBlaster is completely standalone software that does not require any code changes or specific accounting system versions in order to work with your current accounting package. If you have modified or customized your current system, PDFBlaster will not interfere with your modification investment in any way.

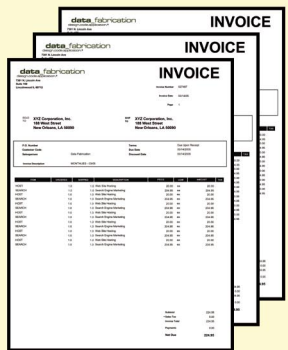

How It Works

Finally! Automated Batch Document Delivery From Your Accounting System!

Users simply print accounting documents and forms to the PDFBlaster printer -- just like a typical hard copy printer. PDFBlaster automatically determines the document type and intended recipient and retrieves the essential delivery data from the linked accounting system database on the fly. Accounting documents are sent out for delivery as an Internet fax or email in seconds, not minutes. The entire process is automatic, so whether you're sending a single invoice or hundreds of purchase orders, PDFBlaster does the work of addressing and transmitting each document to the correct recipient so you don't have to.

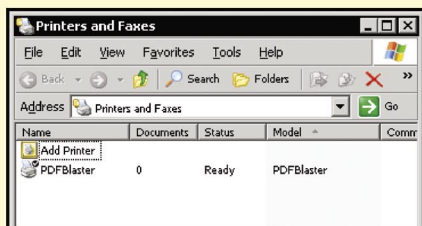

Fax/email delivery diagram

YOUR DOCUMENTS:
Multiple invoices, orders, quotes, Word docs- any document!

Document(s) "printed" to PDFBlaster

PDFBlaster Control Panel

Job ID	Status	Type	To Company	To Name
8	Not Sent	Invoice	Atlanta Trust and Savings	Hank Ehrenberg
3	Not Sent	Invoice	Bay Business Enterprises	Mary Anderson
22	Not Sent	Invoice	Bay Business Enterprises	Mary Anderson
17	Not Sent	Invoice	Atlantic Edison	Jerry Penafra
15	Not Sent	Invoice	Bay Business Enterprises	Mary Anderson
14	Not Sent	Invoice	Super Micro Computer	Leslie Sutton
11	Not Sent	Invoice	Albany Hospital supplies	Henry Grover

PDFBLASTER CONTROL PANEL:
The Control Panel takes all of the documents you've printed, and automatically figures out which need to be faxed, emailed or both.

Supported systems

PDFBlaster supports out-of-the-box integration with virtually every popular mid-market accounting package on the market today. In addition, developers can tap into the powerful PDFBlaster API interface to add batch faxing and emailing capabilities to custom applications or reports. Visit www.pdfblaster.com for an up-to-date list of supported accounting systems and for more information about the PDFBlaster API.

Integrates with Office

If you've been looking for an easy-to-use mail merge solution to fax and email newsletters or other timely marketing information without baffling your users, look no further. PDFBlaster is tightly integrated with Microsoft Word and Outlook, providing incredibly simple mail merge capabilities that eliminate the confusion and complexity associated with connecting to your data sources and linking form fields back to the database.

Blast your business to the new levels of supply chain responsiveness, cost savings and worker productivity with PDFBlaster, the intelligent way to click... print... send!

How to purchase

Are you ready to start cutting costs and increase response times to your customers and suppliers? Are you ready to start increasing worker productivity in a way that directly affects the bottom line? Are you ready to discard your costly fax lines and finicky fax servers? Are you ready for fully integrated, digital document delivery? Then you're ready for PDFBlaster!
